

Design once, engineer right

Tony Gee

Design Once, Engineer Right

Our work is always the best it should be, anticipating challenges and revealing possibilities, avoiding waste and better serving the needs of society and the environment – for today and the future

Wokingham Major Highways Programme

“A firm which has carved out a strong reputation as a provider of technical maestros who can sort out any complex construction challenge”

New Civil Engineer Magazine

Tony Gee and Partners

Tony Gee is an owner-managed business which focuses on civil, structural and geotechnical engineering and infrastructure design services. Founded in 1974, we are a multi-award winning firm which has a reputation for providing high-calibre, complex and innovative engineering solutions, with a particular flair for the unique and challenging.

We have offices throughout UK and overseas locations, and have established, world-leading capabilities that can deliver solutions at an international level whilst recognising the needs of local clients and communities.

We deliver value

Tony Gee has been adding value to design and infrastructure solutions for over 45 years. Our reputation has been built through the delivery of innovative and alternative designs that have embraced the employment of construction methods, modern and innovative techniques as well as the effective use of materials. Our approach is always to work alongside our clients to consider robust, combined solutions, designing both permanent and temporary works together, focussing in particular on integration of design with construction that deliver cost, time and material resource savings.

Our key differentiators and USPs:

Collaborative – Experience in working with clients and contractors on complex projects for many years

Flexible – Flexibility and responsiveness in service delivery

Experienced – Expertise and experience in infrastructure design including value engineering, construction methodology and design integration

Sustainable – Substantial design and technological resource

Understanding – Understanding of construction risk in the design process methodology and design integration

Technical – Highly experienced technical teams exercising regular peer review

Our Culture

Designing for a sustainable future

Sustainability has become a cornerstone of our work. We embrace all the services that are now demanded by client organisations and projects and retain in-house capabilities in sustainability, digital delivery, carbon, social value and whole life costing. We are an accredited carbon neutral organisation.

Giving something back

At Tony Gee we take pride in giving back to communities. Whether this is for the contributions we make to charity and good causes or for the engagement in wider industry and local community activity that we support our staff to make. We empower them to make a difference.

Simply Safe

Simply Safe is our cultural approach to safety and the well-being of people and is woven throughout everything that we do. We value technical excellence – inviting and tackling the hardest engineering challenge but always with a deep commitment to our civic duty to protect our people, our industry colleagues, and the wider public from harm. We can make safety simple by planning ahead, designing right first time, and considering the whole life-cycle of every project.

We value our people and our industry colleagues, their physical and mental health and their wellbeing and always look to continuously learn and improve.

Our people make us

We are a business of people. Our size allows us to maintain our values and culture through simple lines of communication and to be able to remain flexible and responsive to changing demands. We employ highly qualified and experienced staff and develop them through progressive training programmes to develop the broad range of skills across all disciplines that we have built our reputation on.

Our highly experienced senior staff all work at the front line of design work ensuring that clients always get the benefit of their knowledge and that this is passed on through the business.

What We Do

Sectors

-  Rail
-  Highways
-  Power and Energy
-  Marine
-  Aviation
-  Commercial and Industrial
-  Defence
-  Health

Detailed design and related services

-  Research and development
-  Inspections and assessments
-  Feasibility studies
-  Ground investigations
-  Permanent works design
-  Temporary works design
-  BIM
-  Lifting and moving systems
-  Design checking
-  Demolition and façade retention
-  Construction methodology
-  Site monitoring
-  Expert witness

Rail

Bath Spa Station

Tony Gee's railway experience ranges from network infrastructure renewal and enhancement in all regions of the UK to independent validation and verification of high speed railways in Asia.

Operating under contractual arrangements varying from partnering to highly competitive design and build forms, projects are delivered by staff trained to the highest standards of health and safety appropriate to the rail environment.

We have specific experience in:

- Road, rail and pedestrian bridges
- Strengthening with carbon fibre reinforcement
- Polymer composite bridges
- Replacement structures
- Earthworks monitoring
- Earthworks remediation and renewal
- Demolition and temporary works
- Slope stability remediation
- Drainage
- Stations, depots and interchanges
- Permanent way design
- Car parks
- Construction methodology
- Route development
- Independent verification and validations

Highways

Sheik Jaber Al Ahmad Al Sabah Causeway Project (Doha Link)

Our expertise covers most aspects of highways design and construction monitoring on projects ranging from property development schemes to major trunk road improvements and bypasses.

Our reputation for providing solutions to the most difficult challenges has led to work on highly complex road schemes and some of the world's largest bridges.

Our scope includes:

- Site wide infrastructure
- Local authority networks
- Motorways and SMART motorways
- All purpose trunk roads and expressways
- Highways structures
- Planning
- Site surveys and ground investigations
- Geo-environmental studies and remediation of brownfield sites
- Major drainage schemes including forensic drainage investigations
- Integration of non-motorised user facilities
- Ground improvement and formation treatment
- Analytically designed pavement foundations
- Earthworks slope stability and retaining measures
- Advice on maximising re-use of earthworks materials
- Temporary traffic diversions and crossovers

Power and Energy

Leanamore Wind Farm

Tony Gee has successfully completed a diverse range of commissions designing infrastructure to deliver power generated by nuclear, gas and renewable forms of energy. Contractors particularly appreciate our ability to integrate temporary and permanent works design.

Our clients include major utility companies, developers, operators and plant suppliers worldwide.

Our scope includes:

- Power station structures
- Transmission and distribution networks
- On-shore wind
- Site common infrastructure
- Operational equipment manufacturing
- Substations
- Transport logistics
- Geotechnical assessments
- Piling
- Deep foundations and basements
- Access shafts
- Pumping stations
- Marine structures including jetties
- Platforms for heavy cranes and machinery
- Temporary works
- Lifting and moving structures
- Strengthening with carbon fibre reinforcement
- Construction methodology

Hinkley C Tower Crane

Tomatin Substation Delivery

Viking Wind Farm

Brechfa Wind Farm Substation

Dungeness B

Marine

Coastal, river and canal schemes are undertaken for clients including port authorities, developers, asset managers and contractors. We pride ourselves in providing cost effective and frequently innovative solutions to design new infrastructure, repair and maintain existing assets and enhance operation facilities.

Our scope includes:

- Ports and harbour development
- Docks and locks
- Berths and fendering
- Sea and river defences
- Flood prevention, alleviation and emergency response
- Sea and river defences
- Jetties, linkspans and brows
- Pontoons, marinas and quays
- Cofferdams and marine temporary works
- Shoreside facilities
- Piles and dolphins
- Foundations and retaining walls
- Collision protection structures
- Marine inspections
- Legislation consents

Aviation

Skyplaza, Hong Kong International Airport

Working either directly for airport owners or through their supply chain partners, we design aviation infrastructure for airports worldwide. Our ability to integrate permanent and temporary works design with construction engineering methodologies ensures minimal disruption to airport operations.

Our experience includes:

- Airport hangars and roof erection schemes
- Structure stability analyses throughout construction
- Terminal buildings, including airside facilities and mezzanine floors
- Roads and runways
- Control towers
- Footbridges and passenger transport
- Escalator and lift installation
- Multi-storey and surface car parks
- Hotels
- Façade retention

Gatwick Airport Airside Operations Building

Luton Direct Air-Rail Transit

Incheon International Airport Terminal Building Roof

Haeco Hangar

Commercial and Industrial

Singapore Sports Hub

We produce efficient and innovative design solutions for complex buildings and structures for both the public and private sector. This is underlined by our involvement on many significant projects nationally and internationally.

Our services include:

- Foundations, basements and underground works
- Design of heavy foundations
- Construction methodology
- Permanent and temporary works design
- Strengthening with carbon fibre reinforcement
- Façade retention
- Access and infrastructure
- Numerical analysis for ground movement
- Vibration analysis
- Hotels and shopping complexes
- Stadia and grandstands
- Historic structures/listed buildings
- Light industrial buildings
- Multi-storey and underground car parks
- Demolition works
- Hard standings
- Brownfield and greenfield sites

Defence

HMNB Portsmouth

Over recent years it has been recognised that Tony Gee's skill set, offering a holistic approach across a full civil, structural, marine and geotechnical engineering capability, is valued for the delivery of defence infrastructure. This is combined with our robust approach to data security and our ability to work in live, operational environments.

We currently operate in several defence related establishments within the UK. Combining permanent solutions with temporary works expertise we have delivered complex projects and engineering services for contractors and direct clients in a number of locations providing the responsiveness and flexibility for which we are renowned.

Our services are provided with full appreciation of the technical and operational issues surrounding defence projects, including:

- Structural analysis
- Complex temporary load case assessment construction methodology development and assessment
- Peer review
- Safety and environmental regulations
- Working in secure areas
- Data management
- Individual and corporate security
- Liaison between key stakeholders in defence establishments

HMNB Devonport

Health

Queens Medical Centre

Working on construction projects in hospitals, clinics, and treatment centres demands the reliable prompt response for which Tony Gee is renowned. We offer clients a full civil, structural and geotechnical engineering capability, with a sympathetic approach to working in the environment of operational facilities.

Our services are provided by staff with full appreciation of the inherent issues, including:

- Safety and environmental regulations
- Infection and hygiene control
- Vibration limits
- Noise and dust minimisation
- Access and egress for staff and patients
- Security
- Liaison between key stakeholder
